

PRIVATE DWELLING

LOCATION: Glossop, Derbyshire

PROJECT: Refurbishment of Grade II Listed Building

PROJECT LENGTH: 30 Weeks

INFORMATION: The project involved major restoration works to both the external and internal areas of the property. Work was further complicated due to the building being a Grade II Listed Property and as such under very strict planning restrictions and standards.

The work was completed to the great satisfaction of the owner. Quote taken from a local publication on the project:

Successful transformations for private home owners have included the renovation of a neglected Victorian house in the High Peak for a high profile local businessman.

"The place was habitable, but it hadn't been touched for 30 years," said the client. "Adam and his team restored both the exterior and the interior to their former glory and have given us a wonderful family house with all the advantages of modern living, but in keeping with the aesthetics of the property."

He added: "The service has been second to none. Adam and his team listened carefully and then delivered exactly what we wanted."
